

I thought it was a very good seminar and the use of a lot of dogs at different ages was brilliant.

Just wanted to say how productive and interesting you made the day for us the candidates. It was so packed with a sensible and carefully thought out program and with such a selection of dogs for us to see the comparison of your points of the breed standard and most interesting the stages of their development. I was so glad to have been there .

Many thanks for inviting me to attend your very well run seminar. One of the best I have ever attended. Really appreciated the variety of age and the quality of dogs available for us all to view.

[well done on a great seminar, really enjoyed the day](#)

I just wanted to say how informative I found the BAD which I thought was very balanced enabling candidates to appreciate finer points that are relevant and important. Thank you all. But what did find really useful was to see the appraisals of the assessors something that makes you see it though their eyes , which thankfully I was not so far apart !. But it helps; giving you more confidence about your own evaluations and makes you think your on the right lines. Also the extra back up and information that you have produce after the event about judging lists etc has made for it all being a very complete and worthwhile day .
